

# Education & Resource Center

The Education Resource Center aims to connect high-barrier, low-income, vulnerable Cleveland residents to comprehensive, tracked, and replicable literacy training, high school equivalency tutoring, and workforce readiness programming. The program focuses on removing barriers to achieve educational attainment and job placement.

**Impact:** The renovation of the Education Resource Center will not only support becoming a testing site, and supporting one-on-one tutoring needed for adult basic literacy and high school equivalency, but the expanded and renovated testing room/workforce development lab will give high need clients access to computers, a conducive study environment, and access to in-person instructors--leading to certification in high demand jobs. Renovated space will allow for generous office hours that will permit students to work independently but have an instructor on standby for tutoring and assistance.
