

# MomsFirst

The MomsFirst program works with 150 pregnant and parenting teens annually to prevent babies from dying their first year of life. Our 6 Community Health Workers are licensed through the State of Ohio Nursing Board and provide health education, case management, and support to young parents who often face barriers to receiving services.

**Impact:** The updated space will increase storage capacity for such things as diapers, pack and plays, and formula--all essential items to ensure a safe and healthy environment for infants.
