

# Group Therapy Rooms

The May Dugan Center provides a safe, respectful and confidential environment where clients feel accepted and valued. We support low income people who face mental health and substance use challenges and ensure no one is barred from life saving services for inability to pay. Our newest behavioral health components are group therapy offerings that allow clients to relate to peers and gain support from others dealing with similar issues.

**Impact:** The new space will include multiple rooms dedicated to group settings for Mental Health intensive day treatment, Addiction Intensive Outpatient groups, art therapy, and anger management.
